

UTEGLASS  
GLASSREKKVERK SPESIALISTEN

# Introduction

## *The Stainless Steel Handrail Component System*

---

Stylish, durable and cost effective stainless steel handrailing component system designed with ease of installation in mind.

The comprehensive range of components allows you to specify and install without the need for fabrication and maximises on-site flexibility for those changes that inevitably arise.

The system enables the most stylish of handrailing and balustrades to be constructed quickly & simply by the contractor. All you have to do is cut, glue or screw to create professional results every time.

Specifiers can be assured that component design and range flexibility mean installation by a competent installer is a straight forward process.

We offer a range of infill solutions using glass with glass clamps, wire rope, round bar and decorative bars. We can also manufacture infill panels incorporating perforated metal, wire mesh and wire rope netting.

Available in Grade 304 and 316 to suit internal and external applications, you can be sure the quality and product care will provide stunning results.

---

**All fittings are stainless steel with 2mm wall thickness unless otherwise stated.**

---

**Satin polish finish is 320 grit & mirror finish is 800 grit.**

## Features

- » *Economic frameless glass solution*
- » *For use with 10 - 21.5mm glass*
- » *Duplex 2205 (ultra marine stainless) option, stronger and reduced cleaning frequency when compared to Grade 316*

## Duplex Round Spigot

Finish	Code
Satin	1822009
Mirror	1822009M

Not structurally tested.  
To suit 12 - 15mm glass. Height to glass from base is 67mm.  
For M8 x 75mm bolt use code: **5002CCS875**. For M8 x 100mm bolt use code: **5002CCS8100**.

No holes in glass needed

## Grade 316 Cover Cap

Size [mm]	Code
Satin	1822009CP
Mirror	1822009MCP

To suit duplex round spigot

## PACKING SHIM

Code
1822010S

No holes in glass needed.  
Thickness 3mm.

## Round Spigot

Description	Code
Round spigot	1822007
Cover cap	1822007CP

## Square Spigot

Glass Thickness [mm]	Code
12 - 21.50	1822010

No holes in glass needed. Supplied with nut socket. To be used with M12 x 120mm lag screw with Allen key head code: **1899006124**

## LAG SCREW

Size [mm]	Code
M12 x 120	1899006124

With Allen key head. Please order nut code: **189900639** and washer code: **189900633**.

No holes in glass needed.  
10 - 21.5mm Glass thickness.  
Height to glass when packer fitted is 45mm.

## Square Spigot

Description	Code
Square spigot	1822008
Cover cap	1822008CP

No holes in glass needed.  
10 - 21.5mm Glass thickness.  
Height to glass when packer fitted is 45mm.

**PPC Matt Black Spigot**

Description	Code
Square spigot	1822011B
Cover cap	1822011CPB

No holes in glass needed. 12mm Glass thickness.  
 Height to glass when packer fitted is 53mm. Black PPC finish.

# Balustrade Systems

SEE PAGE 12

**Wedge-Loc® Slim**

- Available in satin anodised & mill finish
- Pre-drilled channel fixing holes
- Suitable for glass from 12 - 25.52mm thickness
- Side or base-fix options
- Quick to install

SEE PAGE 15

**Wedge-Loc® F Channel**

- Available in satin anodised
- For installations under screed or decking subframes
- Suitable for glass from 12 - 21.5mm thickness
- F profile allows flush fitting to the edge of your substrate

SEE PAGE 16

**Wedge-Loc® Duo**

- Available in satin anodised & PPC black finish
- Adjustable grips to allow quick alignment of glass
- Suitable for glass from 15 - 25mm
- For installations up to 1.5kN in commercial applications
- + / -1° adjustment on glass
- Side or base-fix options

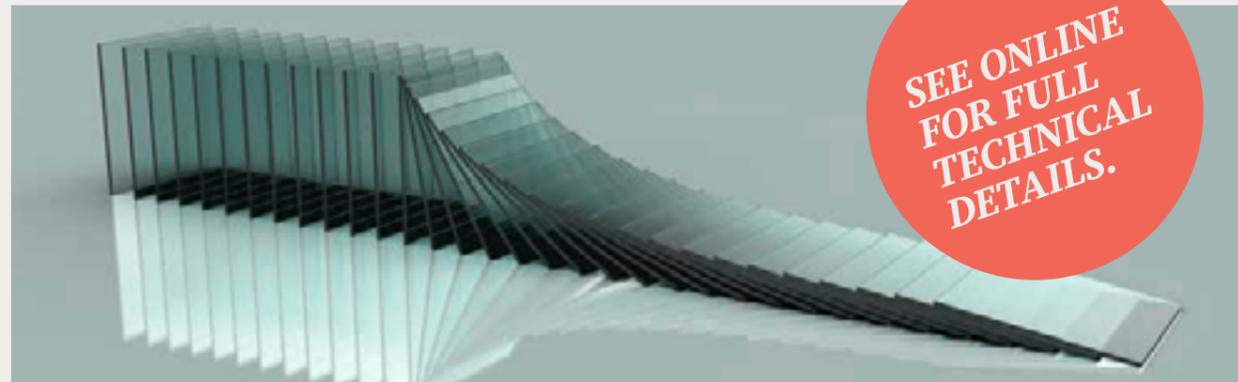

SEE PAGE 18

**Wedge-Loc®**

- Satin anodised (Grade 6063 T6) Aluminium
- Suitable for glass from 12 - 21.5mm thickness
- Up to 30mm tilt adjustment on glass
- Pre-drilled channel fixing holes
- Side or base-fix options

*For our range of pre-assembled posts see from page 34.*

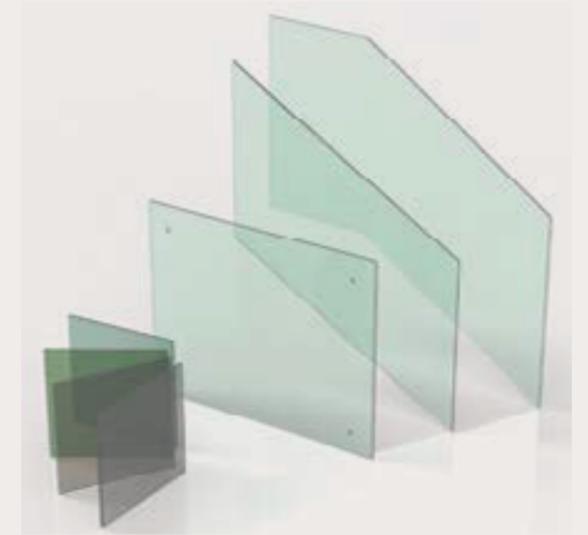

*For our range of glass stand-off adaptors see page 5.*

# Made to Order Glass

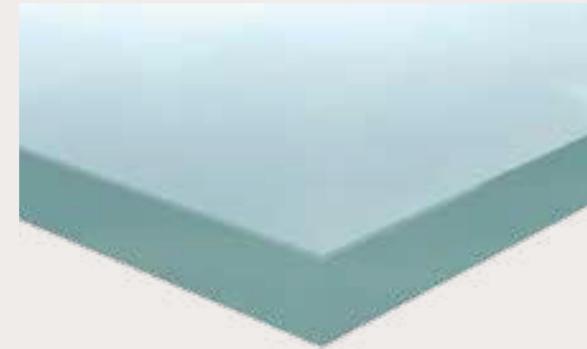

### Square Metre Panels

*Our custom sized per square metre glass panels are polished on all edges and come with docked corners for safety and aesthetic reasons. Glass can be supplied with radius corners, shaped, with cut-outs and drilled at extra cost. A range of coloured glass, etched glass and self-clean coatings also available. The current meterage rates can be checked inline using the following codes and we can then prepare a detailed quote to meet your exact requirements.*

*You will need to add 30% to the meterage price for shapes and cut-outs. Consult with local building authorities and structural engineers to ensure correct glass specifications and fixings are used to achieve the required loadings. Where possible we have tested our systems and individual test reports are available online. For further information visit our website.*

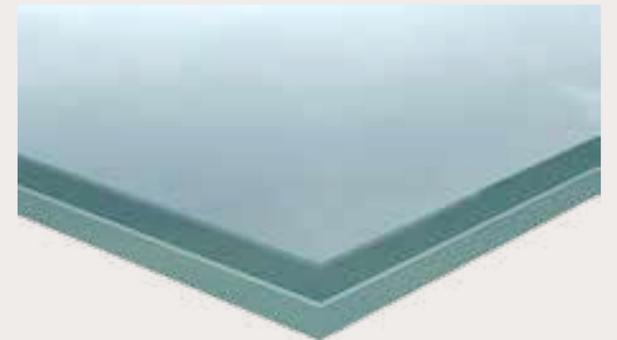

## Toughened Glass

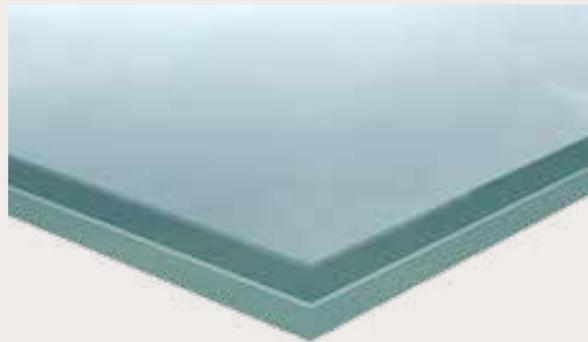

Thickness [mm]	Code
8	185508M

# Tilt-Loc™ Channel

TL86 Series

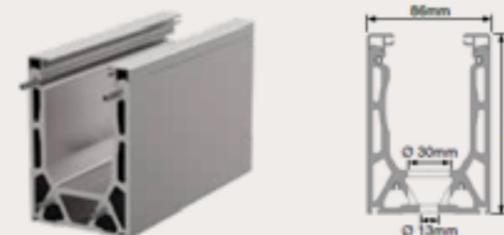

Our top quality aluminium Tilt-Loc™ System has a unique patented rotating pressure plate system which allows for fast easy installation of frameless glass.

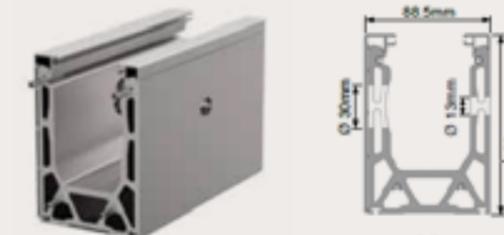

## Features

- » Satin anodised (Grade 6063 T6) Aluminium
- » Up to 30mm tilt adjustment on glass
- » Adjustment from inside the balcony
- » All holes are pre-drilled and fixings can be concealed
- » Suitable for glass from 12 - 25.52mm thickness
- » Glass easily installed and aligned with a spanner

Base Fix

Side Fix

## Tilt-Loc Adjustment Gives Perfect Alignment

For glass loading guidelines visit our website.

### Base Fix Channel

Glass Thickness mm	Length m	Code

# Marano®

## Edge & Curve

Marano® Edge and Curve are a range of innovative railing systems designed to be fully modular. The pre-assembled aluminium posts have a stunning satin anodised finish and are available in square and round profiles ready to install. Fully engineered to meet the requirements of most applications, the systems can be installed with or without a top rail to provide an economical solution for a post and glass panel design. Each system can be fully fitted using basic equipment

### Features

- » Fully assembled posts
- » Aluminium & satin anodised finish
- » To suit 10 mm glass
- » Suitable for indoor & outdoor installations

- » Quick, safe & easy installation
- » Gap between handrail & glass is 80mm
- » Bottom edge of glass to floor is 90mm
- » Tested to 1.2m posts centres
- » Posts available in bolt-down & side-fix
- » Posts are supplied complete

### Square Posts With Handrail

Railing Height 1125 mm

- Glass panel is H 930 x W 1174mm

### Square Posts Without Handrail

Post Height to 1100 mm

- Glass panel is H 1010 x W 1174mm
- You will need to buy blanking caps or notched post caps to suit design

### Now Available In 3 New Colours

- Anthracite RAL 7016
- Black RAL 9005
- White RAL 9010

**When using standard glass width 1174mm you will have approximately 13mm between post centre and glass for ease of installation.**

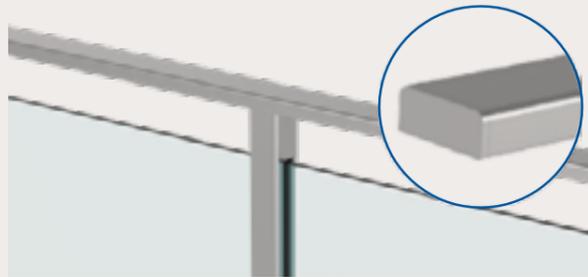

Image shows a square post using a rectangular handrail.

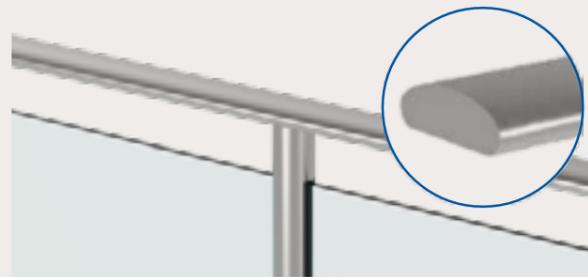

Image shows a round post using an oval handrail.

**Rectangular & oval handrails can be used with both square & round posts. For handrails see page 31.**

- Aluminium
- Duplex 2205

## How To Tackle Corners

**Mitred Cut Without Post**

**Mitred Cut With Post**

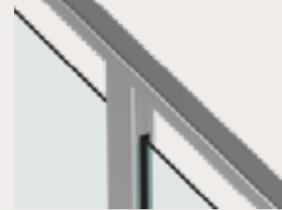

## How To Tackle Gradients

**Mitred Cut Handrail**

**Mitred Cut Post**

## Fitting Glass

Fitting glass is easy with our 4 step guide.

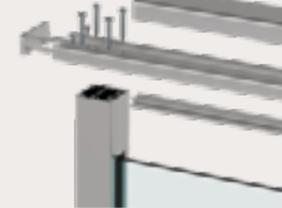

Fit back rubber to the post.

Slide glass in from the top between posts.

Fit glass retaining rubber, top packer & infill.

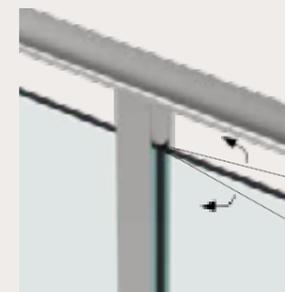

Fit the handrail (using the location jig, see pages, 30 & 32). Slide on the handrail under-cap and top handrail.

When fitting glass make sure the back rubber is fitted to the post, then install retaining rubber once glass is in place.

**Installation guide & video are available on our website.**

## Post Height

- Posts can be cut down if a shorter height is needed
- Capping will slide back in to give 80mm gap from glass to rail
- Allows 8 - 10° glass angle each side with rubbers

Spray soapy water on rubbers to help slide glass into rubber locators.

**Glass panels on page 33.**

# Pre-Assembled Posts

**HANDRAILING MADE EASY! MORE DESIGNS - MORE OPTIONS STRAIGHT OUT THE BOX AND READY TO INSTALL**

Save a huge amount of time and money with our extensive range of pre-assembled posts, supplied from stock. They are all tested to BS 6180. No drilling of tubes, no bolting on of glass clamps and no welding of base plates required. We've done the work for you!

**Straight out of the box and ready to install:**

- Ø 42.4 & 48.3mm round posts
- 40 x 40mm square posts
- Strand wire rope posts
- Crossbar holder posts
- Satin & mirror polish
- Stainless steel Grade 304 & 316

**Standard Glass Panels**

We stock a large range of widths of 10mm toughened glass panels in 100mm increments to make your installations even quicker, easier and more cost effective. See page 37 for our full range.

# Pre-Assembled Posts

## Choose Your Own Post Top

Our pre-assembled glass clamp posts are supplied without a saddle or post cap, so you can choose the exact design to suit your requirement. The choice of tops available allows you to pick and mix from a huge range of options that will allow you to end up with your very own bespoke solution.

*Here are some useful dimensions to help design your installation.*

*All our posts are designed to give an installation height of 1100mm or more.*

For full technical drawings visit our website.  
If you don't see what you need please ask.

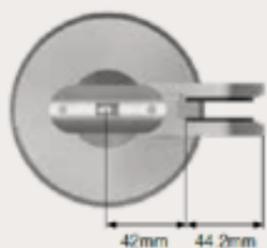

Welded base fitting complete with rubber 'O' ring and cover

Welded base fitting complete with cover.

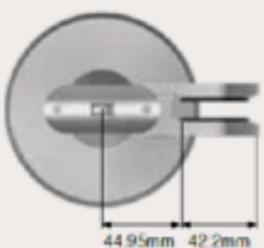

Glass clamp for 10mm glass (8 and 12mm rubbers available).

Variable fixing bolt.

### Ø 42.4mm POSTS

### Ø 48.3mm POSTS

### 40 x 40mm POSTS

## Timeless - stainless steel posts and glass panels with handrail

Our Timeless post systems that use 10mm glass panels and have a top rail, are all tested to BS6180 loading requirements.

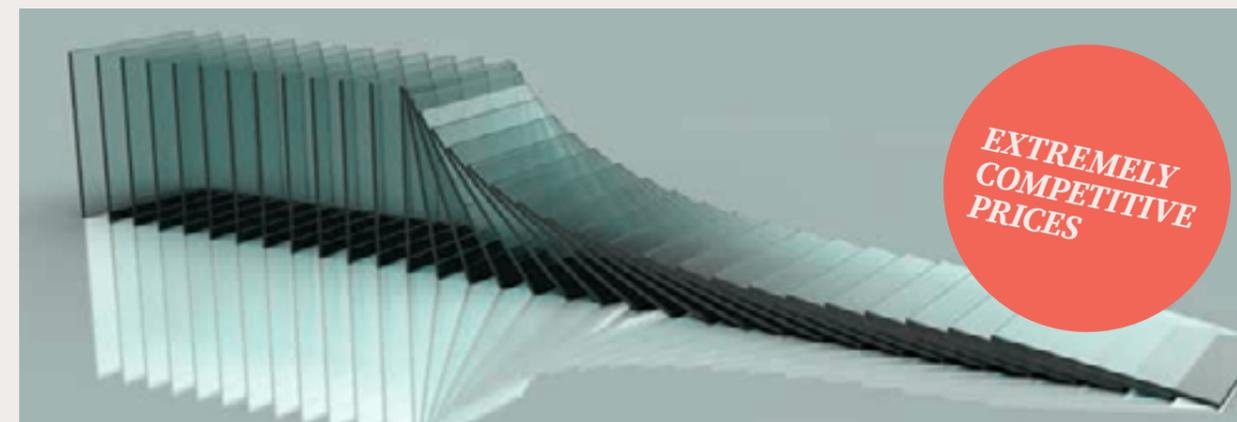

## Contemplation - stainless steel posts and glass panels without handrail

Our Contemplation post systems that use 10mm glass panels and have no top rail, will not pass BS6180 loading requirements and should therefore only be used as demarcation, or in areas where the fall is not more than 600mm.

For our standard stocked glass panels see pages 10 & 37.

# Made To Order Glass

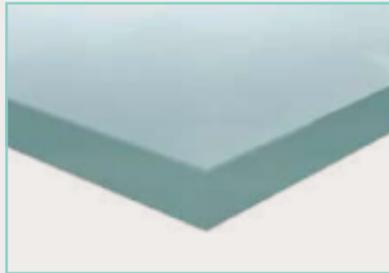

## Square metre panels

Our custom sized per square metre glass panels are polished on all edges and come with docked corners for safety and aesthetic reasons. Glass can be supplied with radiused corners, shaped, with cut-outs and drilled at extra cost. A range of coloured glass, etched glass and self-clean coating is also available. The current meterage rates can be checked online using the following codes and we can then prepare a detailed quote to meet your exact requirements. You will need to add 30% to the meterage price for shapes and cut-outs.

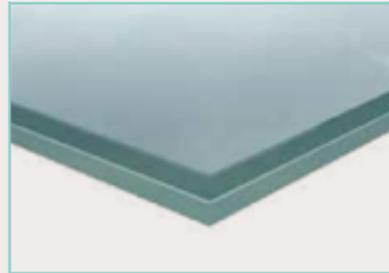

Consult with local building authorities and structural engineers to ensure correct glass specifications and fixings are used to achieve the required loadings. Where possible we have tested our systems and individual test reports are available online. For further information on the classification of building occupancy & glass loadings, visit our website.

Up to 5 times stronger and 100 times stiffer than conventional interlayers

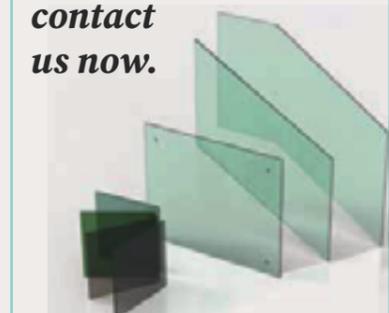

**Templating Sheets**

We can provide suitable templating material that can be cut to suit any special shapes on site. This is sent to our factory for production to match the template exactly, using modern imaging scanning technology to duplicate your design. Price and availability for bespoke panels are available on application.

# Wire Rope System

Stainless steel Ø 3 and 6mm strand wire rope system is a simple and cost effective alternative to our crossbar system. It can be fixed to most surfaces including wood, metal and brick and is ideal for external applications in residential and commercial environments. Suitable for self assembly and simple to install using self locking, crimped or glued connectors.

Includes 1 x threaded cable tensioner, cover cap and end fitting.

## Installation Using Cable Tensioner

- 1 Crimp wire into cable tensioner and insert through pre-drilled hole on starter post.
- 2 Add washer and nut and loosely tighten.
- 3 Insert end fitting through end post, pull tight, cut wire flush with fitting.
- 4 Screw on cover cap.
- 5 Tighten nut on starter post to bring the wire under tension.
- 6 Cut excess protruding thread and screw on cover cap.

# Glass Clamps

The most popular method for providing a glazed balustrade, while at the same time keeping the outlook open and views beyond visible. Glass clamps are simple to install and are offered in either a square or radiused option, providing a glazed system between posts. Compatible with 8 to 21.5mm thick glass, clamps can be used over any length of installation as well as slopes and staircases.

# Glass Fixing Information

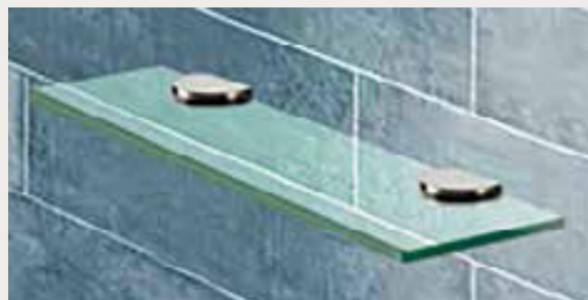

If using glass clamps in any installation where the glass is fixed to the outside of a staircase and overhanging, then security pins (code: 189900401 or 189900402) and drilled glass must be used.

- Cast Zamac clamps are a cheaper alternative to stainless steel. Available in a mirror finish, satin finish or mill finish (suitable for powder coating). Not for external use.
- Cast Aluminium clamps are a new innovation, that can be used internally or externally.
- Cast Stainless 304 clamps are available in satin polish and are for internal use.
- Cast Stainless 316 clamps are available in both mirror and satin polish and for external use.
- Cast Duplex 2205 (ultra marine) for external applications, ideal for use in close proximity to the coast.

# Shelf Clamp

## Satin Finish Small

Back	Glass mm	Code
Flat	8	1806400F

Not suitable for handrailing applications. Typical uses are for display and shelving. H 20 x L 40 x D 16mm. For 6mm rubbers, order code: 1899001S06.

# Weldable Glass Clamps

An economic alternative to the traditional glass clamp system. They not only look good, but are easy to install with no on-site fixing and if required the mild steel clamps can be galvanised and powder coated after fabrication.

### Specification

- » Stainless steel Grade 316 M8 dome nut & countersunk bolt
- » Rubber washer
- » 6mm plate & disc
- » Suits 8 - 12mm glass thickness
- » Mild steel & stainless steel

# Fortitude™

## Introduction To The Range

Fortitude Traditional railings are one of the easiest, most versatile, off the shelf handrail solutions on the market today. The range consists of a series of railing panels, posts and brackets that can provide a number of different design solutions. Available in either a long lasting, UV resistant, stylish black sand or white gloss finish.

The steel panels can be cut to size on site, to suit different post centres. The innovative and unique steel raking panel can be adjusted, to allow the installation of railings on stairs and gradients, without needing to pre-fabricate. The panels are cleverly designed to conceal the pivot points of each spindle.

Our Fortitude Contemplation range of posts with glass clamps and 10mm standard glass panels, provide an off the shelf, stylish handrailing system, which maximises the view from your deck. There is nothing to stop the mixing of Traditional steel panels and Contemplation glass panels, to open up the view in specific sections of an installation.

The two styles of Contemporary Glass Panels or Slats, are supplied in a kit with an aluminium top and bottom rail, that cleverly integrates the glass into the design. The glass is available in a clear or grey tint. If you wish to cut the kits to length, glass can be supplied made to order to suit.

### Contemplation

### Traditional Panels

### Contemporary Slats

### Contemporary Panels

#### INTRODUCTION TO THE RANGE

Available in two polyester powder coated finishes, a contemporary black sand and an elegant white gloss. Fortitude is a high quality, long lasting handrailing solution. It is made from pre-galvanised steel, which is then sprayed with a protective zinc phosphate coating, then treated with a further coating, before finally getting treated with a high quality Akzo Nobel UV resistant powder coated finish.

#### FORTITUDE RAILINGS • PURE QUALITY • PREMIUM FINISH

- Made from pre-galv steel
- Zinc Phosphate pre-treatment
- Electro coated
- Quality Akzo Nobel powder coated finish

For ease and simplicity all our brackets are supplied with suitable fixings for use on steel or wooden posts.

#### Bracket For Steel Posts

#### Bracket For Brick Pillars

#### Bracket For Wooden Posts

#### Glass Clamps For Steel Posts

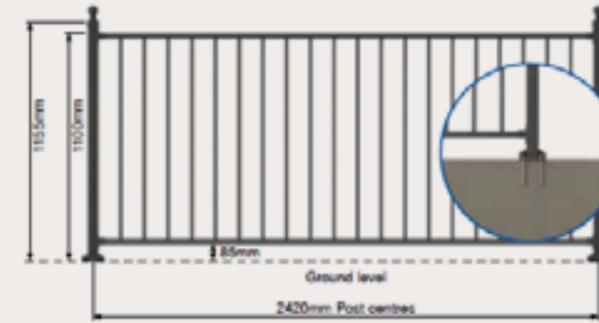

*To complement your fortitude handrail, why not take a look at our composite deck boards on page 105.*

Raking panels adjust to max. 40°

## Traditional Railing Panels

### Steel Railings

#### Fixed Railing Panel

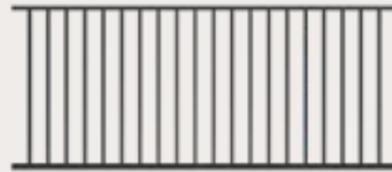

To give 1100mm high railings

Color	Height mm	Width mm	Code
Black Sand	1016	1200	64FR1012B

Horizontal rails: 25mm x 1.5mm wall thickness. Infill bars: 16mm x 1.2mm wall thickness

#### Fixed Railing Panel

To give 1100mm high railings

Color	Height mm	Width mm	Code
Black Sand	1016	2370	64FR10B
White Gloss	1016	2370	64FR10W

Horizontal rails: 25mm x 1.5mm wall thickness. Infill bars: 16mm x 1.2mm wall thickness.

#### Fixed Circles Railing Panel

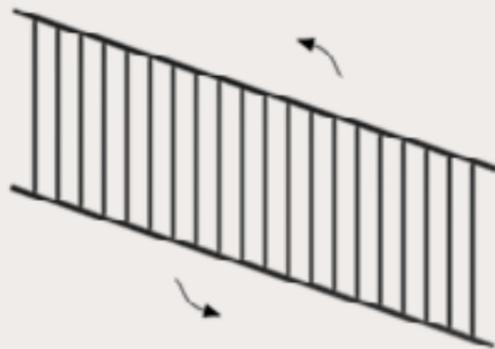

To give 1100mm high railings

Color	Height mm	Width mm	Code
Black Sand	1016	2370	64FRC10B
White Gloss	1016	2370	64FRC10W

Horizontal rails: 25mm x 1.5mm wall thickness. Infill bars: 16mm x 1.2mm wall thickness. Circles: Ø 96 x 8mm.

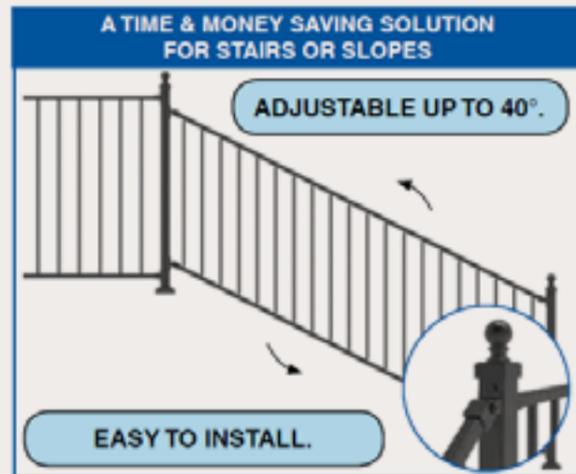

#### Adjustable Raking Panel

For stairs & slopes, up to 40°

Color	Height mm	Width mm	Code
Black Sand	863	2320	64ARP10B
White Gloss	863	2320	64ARP10W

Horizontal rails: 25mm x 1.5mm wall thickness. Infill bars: 16mm x 1.2mm wall thickness.

#### Railing Gate Kit

To be used with a cut to size railing pane

Color	Code
Black Sand	64GK5011B
White Gloss	64GK5011W

38mm tube to create gate frame.

#### Gate Hinge

With 2 legs

Size mm	Code (Pair)
23 / 23	09FA20
White Gloss	64GK5011W

Maximum gate weight 52kg per pair. Polymer.

#### Unsprung Hinge

Suitable for 25 - 50mm posts

H x W mm	Code
90 x 70	09FA30
110 x 75	09FA31

Maximum gate weight 50kg per pair. Polymer.

#### MAGNA Latch

General purpose magnetic gate latch

Code
09FA27

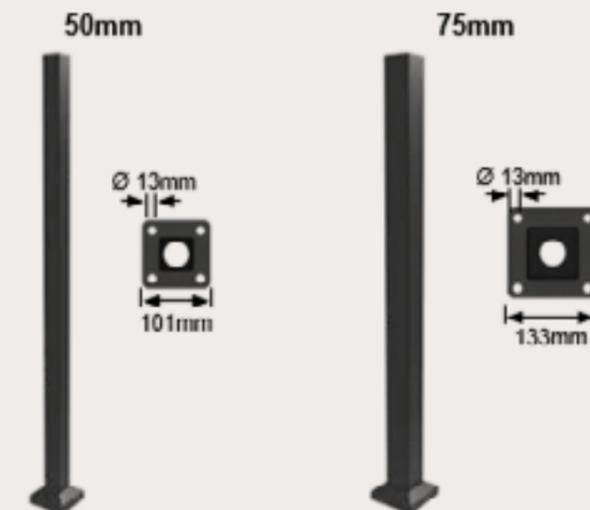

Non-lockable. Side Pull. Polymer.

Supplied as a pack of 4, with 12 x self-drilling screws.

# Concrete Screws & Bolts

## COUNTERSUNK SCREW CR-LX-CS-ZF

### APPLICATIONS

- Through-fixing
- Temporary anchorage
- Framework support systems
- Balustrading & handrails
- Fencing & gates manufacturing & installation
- Racking systems
- Public seating
- Scaffolding

### FEATURES

- ETA 17/0806
- Zinc flake
- Self-tapping
- Completely removable for possible reuse
- Non-expansion
- For use with cracked & non-cracked concrete

## MULTI-FIX HEX HEAD BOLT

### APPLICATIONS

- Heavy duty non-expansion anchor
- New solution for heavy duty anchoring into concrete, brick, stone, wood & concrete block replacing the need for traditional anchors
- For use in pre-drilled shallow concrete holes

- Unique patented concave thread design which taps its own thread & provides rapid, low torque installation with exceptional pull-out resistance
- High low parallel threads for ease of insertion and high pull out values
- It allows the user to adjust or remove & use again

7 x 30mm plugs, 4.0 x 40mm screws.

# Universal Frame Fixing (R-FFS)

The unique expansion zone ensures optimal anchorage depth, guaranteeing the highest fastener load capacity. Thanks to this, it can be used in all types of substrates with minimum installation times. High load capacities and the use of steel class 6.8 make it recommended for light steel structures like balustrades and handrails.

## FEATURES

- Hexagonal head with collar
- R90 fire resistance and A1 fire classification allow the product to be used in most applications
- High shear strength thanks to the use of steel grade 6.8
- Quick installation thanks to 2 reduced anchoring depths: 40 mm in concrete and solid brick\* (categories A and B\*) 50 mm in substrates with hollow brick and aerated concrete (categories C and D)
- Use a punch-tool to increase a performance in aerated concrete

## BASE MATERIALS

- Cracked and non-cracked concrete ≥ C12/15 (Use category A)
- Solid brick or solid sand-lime brick (Use category B)
- Hollow brick or hollow sand-lime brick (Use category C)
- Aerated or hollow lightweight concrete block (Use category D)

Please note the plastic plug is fitted through the fixture so the screw has no contact with the material eliminating cross contamination from dissimilar metals.

# Rinato™ WPC Fencing

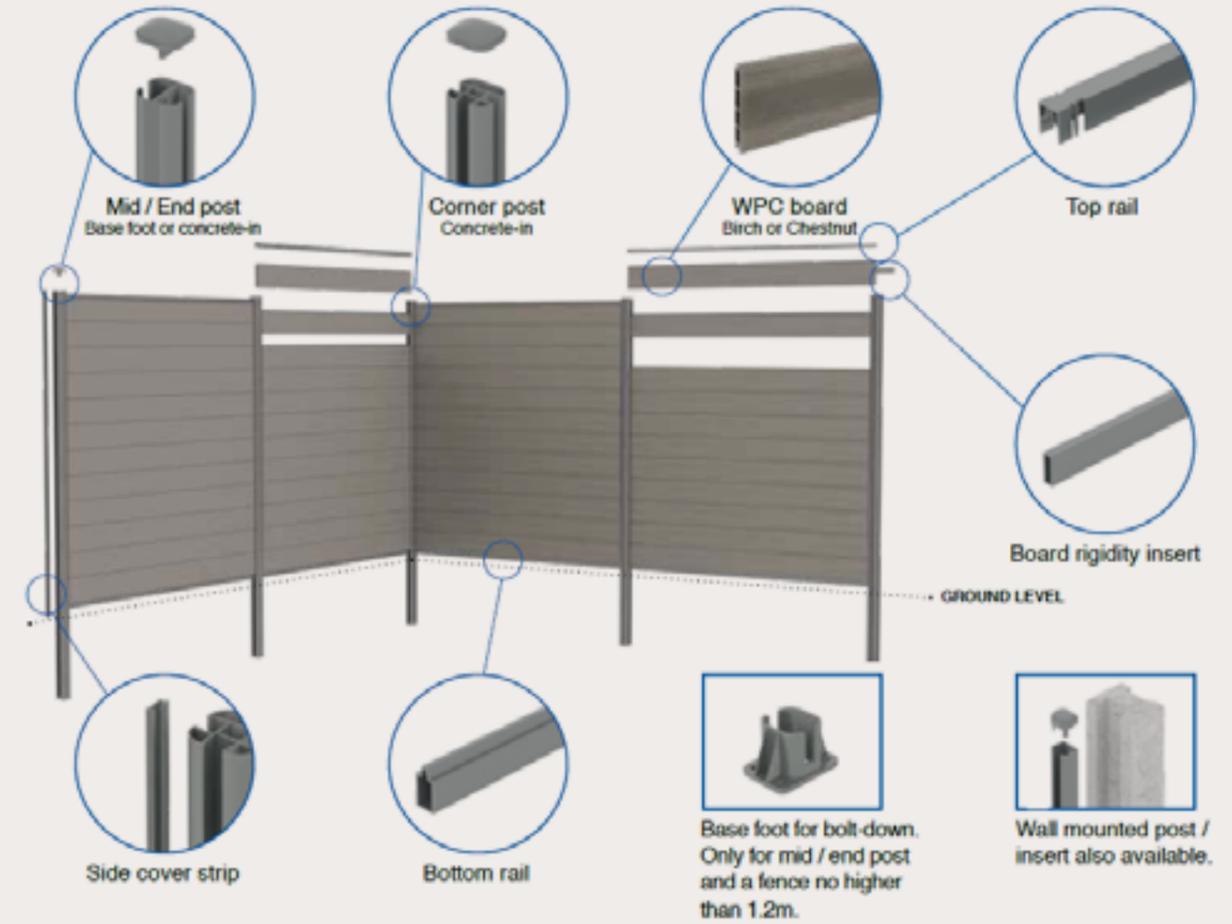

The look of wood without the hassle

Our Rinato WPC fencing system looks amazing and is both easy to use and cost effective. It will also enhance any garden and create a contemporary focal point. This versatile recycled composite system is an eco-friendly product made from combining waste wood particles and thermoplastic resin. It is waterproof, strong and easy to maintain. We have bolt-down and concrete-in aluminium post options, and if you would like to use our WPC fencing between your existing concrete posts we have inserts to fit them. We have two colours to choose from: Chestnut or Birch.

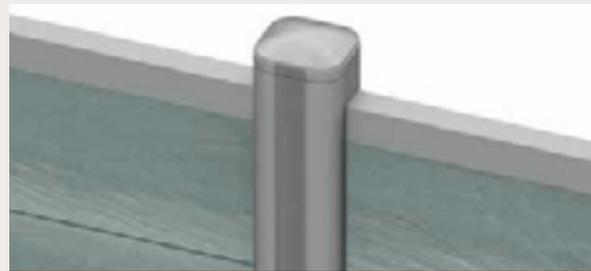

- Long-lasting & low maintenance
- Boards available in 2 colours - Birch or Chestnut
- Standard fence height 1.8m with 1.8m post centres
- Aluminium concrete-in or bolt-down post options available
- Posts & boards can be cut to create a lower or narrower fence

- No more frost damaged, cracked or chipped concrete posts
- Panels are built quickly using tongue & groove boards
- Easy to carry & deliver; much lighter than concrete posts
- Recycled, eco-friendly FSC® certified wood
- Wall mounted post / insert available for pre-existing posts

	Grade 304		Mild Steel
	Grade 316		Galvanised

# Synergised™ - Porcelain Tiles

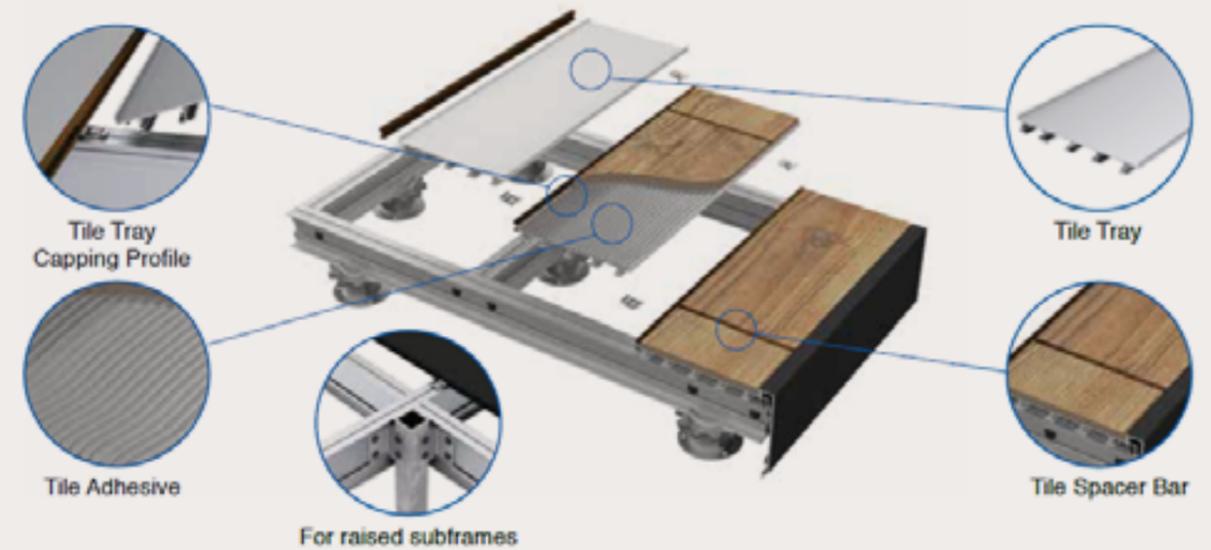

External Decking Solutions

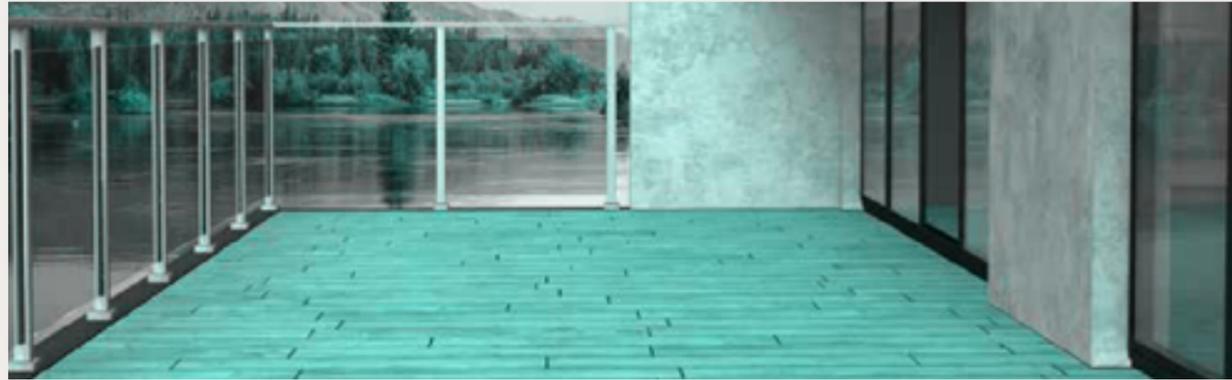

As part of our Synergised framing & decking program the La Fabbrica range of porcelain stoneware reaches new heights in style and engineering, taking all the beauty and charm of the finest timbers. Safe, sustainable, versatile, and refined, Italian excellence with unbeatable quality. The tiles can flow seamlessly from inside your house to outside, changing only the surface texture with the designs dominated by the warmth and texture of wood. Whether on flat ground, a raised patio or high-rise balcony, you can now step out of your house onto porcelain tiles that look like natural wood. And it's fire rated too covering all current and proposed fire regulations.

Ca' Foscari recreates the warmth and natural appearance of textured wood, while the knots and veining in Yosemite convey the warm and traditional recreation of wood. Both offer elegant and contemporary style to any setting, whether residential or commercial it offers a long lasting low maintenance solution.

- Stunning wood effect Italian porcelain from one of Italy's top design houses
- A1 and A2fl-s1 fire rated
- Low surface temperatures
- Ideal for elevated patios, all decking applications, and all types of balconies
- Build your dream elevated stone patio without the need for expensive retaining walls and backfill materials
- 1000mm joist spacing for 30mm boards & tile support trays
- Dramatic reduction in hard landscaping costs
- Perimeter base section allows for our wide range of handrail systems to be fully integrated into your project

*The perimeter base section allows for our wide range of handrail systems to be fully integrated. See page 103.*

# Synergised™ - Decking System

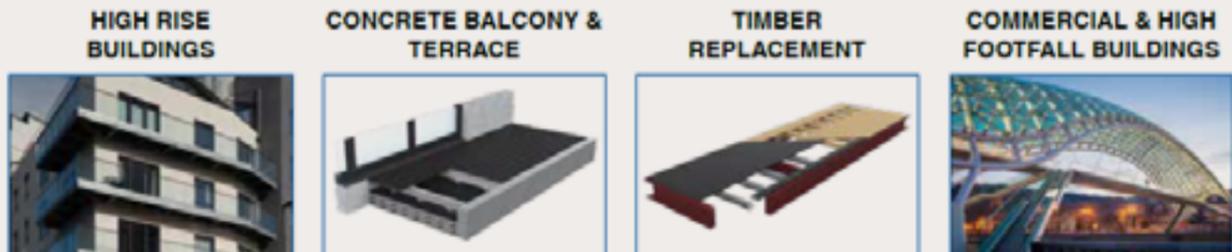

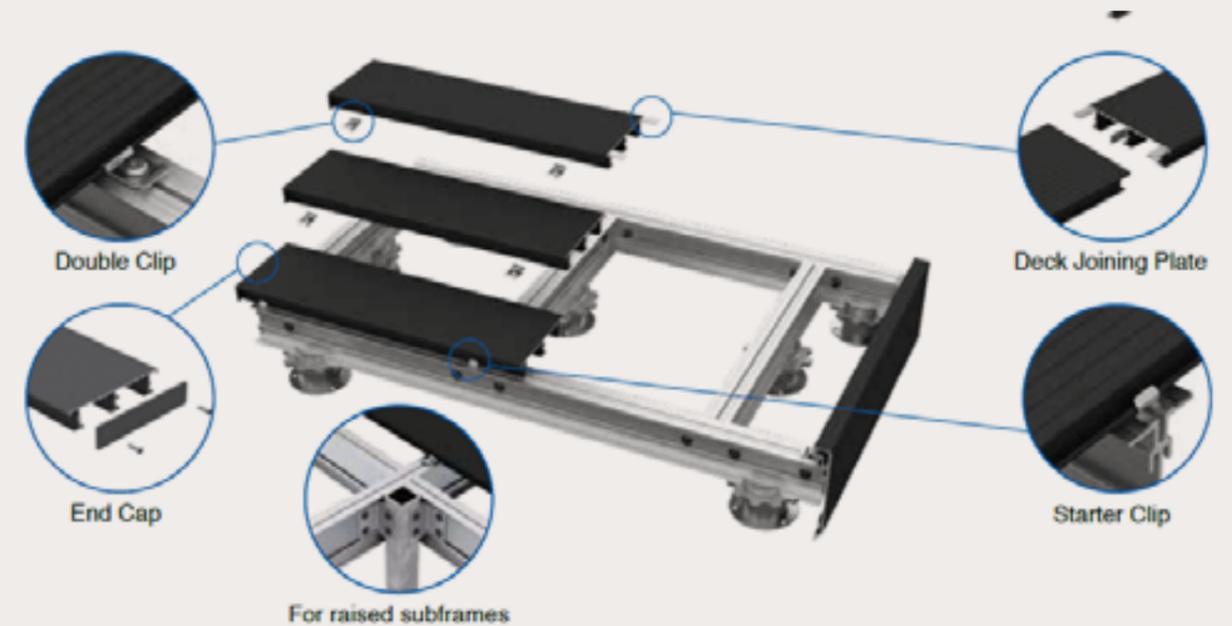

Innovative fire rated aluminium decking solutions

The Synergised range of aluminium deck products has been tested by the UK's leading fire test centre to EN 13823,

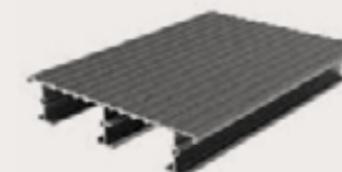

EN 13501 and EN ISO 1716. All elements of the Synergised System achieve Euroclass Classifications of A1 and A2fl-s1. Available in 3 contemporary colours and manufactured from structural grade 6063 T6 aluminium with a 100 micron Qualicoat™ premium powder coating, these are the ideal decking solution for both residential and commercial high footfall environments such as high rise balconies, walkways, terraces, pubs, gardens and much more. Installation couldn't be easier, with our innovative cradle base and joist support system that offers up to 50% cost saving compared to other solutions. Once installed the system is long lasting and low maintenance with a manufacturer's limited warranty

- A1 and A2fl-s1 fire rated
- Made from structural grade 6063 T6 aluminium
- Ideal for high rise concrete balconies & terraces
- Up to 50% cost saving when compared to other systems
- 100 micron Qualicoat™ premium powder coating
- Adjustable cradle and deck support system
- Cradle spacing up to 1800mm
- Low surface temperatures
- Long lasting and low maintenance
- Lightweight and easy to install
- Mill finish subframes and cradles
- 10 year warranty on powder coating

45mm

Code
79PED45

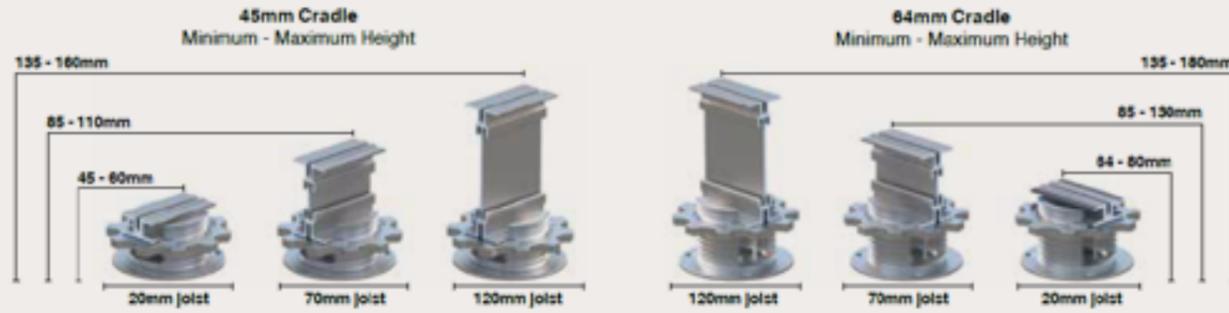

Minimum height 45mm. Maximum height 160mm.

64mm

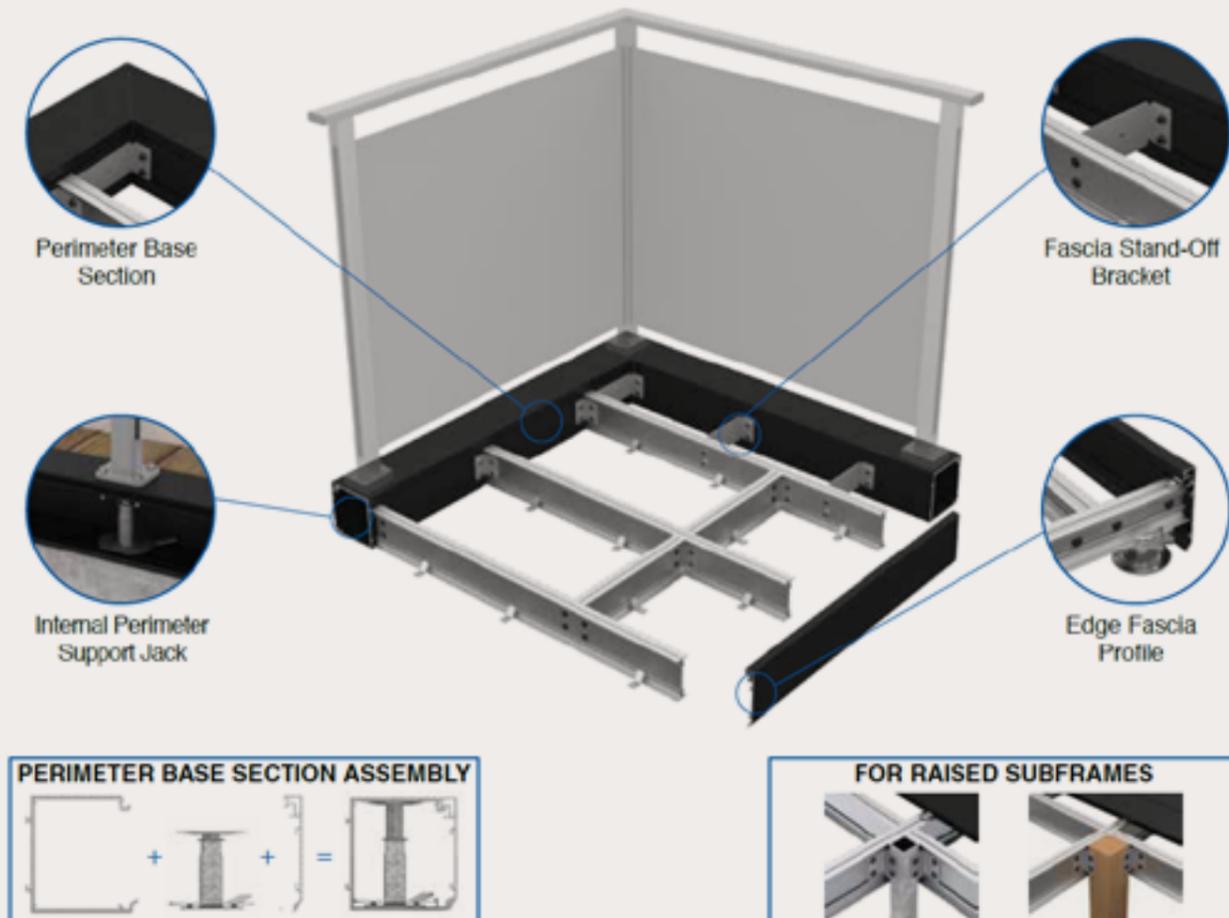

Code
79PED64

Minimum height 64mm. Maximum height 180mm.

# Synergised™ - Decking System

## Perimeter Based System

Our unique innovative perimeter base section, bolts directly to the Synergised subframe. It allows for a wide range of our base fix handrailing solutions to be bolted down to the perimeter, to provide a safe, stunning edge protection where there is a fall of more than 600mm. The Internal Perimeter Support Jack provides the strength required to allow handrailing systems to reach the desired residential 0.74kn loading requirements, as per BS6180.

If handrailing is not required, then our Edge Fascia Profile can be fitted to discreetly hide the subframe. The Edge Fascia Profile is supplied powder coated black, to contrast stylishly with the range of ceramic tiles and handrailing solutions, it also perfectly matches the perimeter base section when used alongside on the same project.

**Perimeter Base Section**

**Edge Fascia Profile**

**Internal Perimeter Support Jack**

**Fascia Stand-Off Bracket**

Quantity	Code	L x D mm	Code	Code	Code

For use with edge fascia profile code: 79EFB100. Polyester powder coated black RAL 9005.

Polyester powder coated black RAL 9005.

Adjust to desired height and rotate lever to lock in place.

For use with perimeter base section code: 79PB150B. Stainless steel.

# Create a Stunning Finish With Rinato™ Deck Boards

# Rinato™ Deck Boards

The Look of Wood Without the Hassle

With our range of composite deck boards there is a style, colour and price to suit everyone. These boards are easy to install and look fantastic. As well as being environmentally friendly, all our decking is virtually maintenance free, is incredibly durable and will remain so for years to come. Experience the beauty of wood without the hassle.

## FEATURES

- Virtually maintenance free
- Does not absorb moisture
- Easy to keep clean & stain free
- Excellent UV resistance
- Splinter free
- Anti-slip resistance tested
- Mould free
- Rot free
- Easy to install
- Workability - similar to wood
- Solid & hollow core options
- Made from recycled material
- Recyclable
- Non-toxic
- Flammability tested

## AVAILABLE IN TWO RANGES:

**NATURAL** - Features a 360 degree wrap around Polymer Capstock shield that encapsulates the hollow core deck board and gives it year-round protection against the elements and is suitable for a variety of outdoor uses. Available in 3 colours and with an enhanced natural woodgrain effect one side and traditional flat sanded effect the other.

**VICTORIA** - Uses less composite material thanks to the 'M' design on the underside, making the board lighter and more economic, the perfect cost-friendly choice for every garden, balcony or patio. Available in 4 colours, boards are single-sided with a choice of natural woodgrain effect or a traditional grooved effect across all the colours.

All our deck boards are supported with a warranty.
